INFORMATION FOR CUSTOMERS

RICHMOND, Maine, is 40 miles north of Portland, on the Kennebec River, where our farms are located in the central potato belt of the State. We have the very best of shipping facilities via Maine Central Railroad and Eastern Steamship Co.

Our crops are thoroughly protected with Bug Death, keeping them free from all bugs, rust and blight¹ germs until full maturity, allowing the seed boll to mature. No Paris green or arsenic used on our potatoes.

Unless otherwise specified all shipments will be packed in clean, strong sacks containing 165 pounds of potatoes.

We will be pleased to quote prices on any quantity. Better get our prices before ordering your seed potatoes for this season's planting.

The office of our President and Treasurer is at Leominster, Mass., where all communications should be addressed.

JOHNSON SEED POTATO COMPANY,
Leominster, Mass.

EARLY WHITE ALBINO

THIS wonderful new early potato is a good cropper. The skin and flesh are extremely white, of exceptionally good cooking quality and very prolific; fully as early as the old Early Rose in maturing and particularly valuable for the early market by reason of its fine shape and early maturity. The vines grow erect and it is one of the best early varieties to withstand blight and disease. Plant this potato early in good soil and give it good cultivation and pleasing results are sure at harvest time. One grand thing in favor of this early potato is its good keeping quality. Prices quoted on application.

SNOW (White). Sometimes called Poor Man's Friend

ON account of the large yields that have been reported of this potato it is rightly entitled to be called the "Poor Man's Friend." It is of handsome shape and most desirable for the best trade. It is a vigorous grower, ripens uniformly, is a good keeper and is fast becoming one of the most popular medium late varieties. The vines are always very heavy, the seed being especially vigorous and tubers always good size where soil is well tilled. Our customers will find the Snow a very reliable potato. We can furnish nice stock while the supply lasts. Prices quoted on application.

JOHNSON SEED POTATO CO., RICHMOND, MAINE

GREEN MOUNTAIN, JR. New White Seedling.

ORIGINATED by W. E. Johnson in 1905. An inbred Green Mountain; seed boll grown on Green Mountain and pollenized with Green Mountain. It is practically thorough-bred or pure-bred. It has all the parent's good qualities and in general appearance is the same, except it is a trifle whiter in color and the skin is more netted. It grows round to oblong, somewhat flattened; eyes shallow. The sprouts in spring are white and stubby and do not grow very long. Soon after the stalks appear above the surface they branch very much, the broad, dark green leaves lying close to and completely covering the ground, which will kill weeds and grass and have a tendency to hold moisture. It will make a vigorous, rapid growth, set a large number in the hill and mature to the best marketable size a few days earlier than its parent. Blossom is white, with yellow center stalks. Cooking quality excellent. The past season on our trial grounds it gave a yield at the rate of 640 bushels per acre.

NORCROSS. Pure White

ORIGINATED in 1895. Seed boll grown on the old Early Rose pollenized with Beauty of Hebron. Singular as it may seem, this potato is one of the late maturing varieties, somewhat blocky in shape, smooth surface, very excellent table quality, cooking dry and mealy. Grows a thrifty, upright top, with large leaves, and is above the average of the white kinds to withstand blight. It has a wonderful reputation in New England and New York State for its superior quality and large yield. Ask for special prices.

JOHNSON SEED POTATO CO., RICHMOND, MAINE

THE VINES OF NEW SEEDLINGS are so young and tender that they are especially attractive to bugs and flea beetles as well as blight. To protect against these evils we use Bug Death dry, applying with the Dickey Bug Death Duster or the Farnham Dust Motor, just at night or early in the morning, when the vines are moist with dew and the air is quite still, to prevent wasting the fine powder.

We also grow the following varieties of potatoes and will be pleased to name prices on application.
